

Ceiling Mount Type Ventilating Fan

天花板型換氣扇

Ventilation and Indoor Air Quality 換氣系統及室內空氣質素

Buildings nowadays, especially homes are tightly built with aluminum casing windows and rubber lining door in order to retain energy efficiency. Most homes and commercial buildings have windows and doorways that are sealed to limit heating or cooling loss. These, however, it comes at the cost of poor indoor air quality (IAQ). That means, staying indoors will not give us clear and fresh air because the concentration of indoor pollutants, such as odors, dust, pet dander and bacteria, can reach up to five times higher than found outside. These biological pollutants can be hazardous to occupants and structural integrity.

現今的大廈樓宇，大多數是用鋁框窗架和橡膠襯裡窗門建成，目的是為了節約能源。大多數住宅和商業樓宇的窗口和門戶都被密封以限制熱能或制冷的損失。然而，這些會導致室內空氣質素(IAQ)降低，因為室內污染物的集中，例如氣味，塵土，寵物頭垢和細菌，相對室外的污染物可高達五倍，換言之，留在室內不一定會帶給我們新鮮空氣。這些生物污染物對住客和樓宇結構造成傷害。

Volatile organic compounds (VOCs) are carbon-based compounds that easily evaporate. These types of gases are released from building materials, carpets and furniture naming "outgassing". Other household items emit VOC include hair sprays, paints, lacquers, finishes, cleaning solvents, pesticides, etc. VOC can ultimately sensitize certain people to react to them.

揮發性有機化合物(VOCs)是碳基化合物並容易揮發。這些類型的氣體來自建築材料、地毯和家具，俗稱「除氣作用」。其他家居用品包括噴髮膠、油漆、亮漆、拋光劑、洗滌劑、殺蟲劑等都會散發VOC，而VOC可使某些人有致敏反應。

Hazardous indoor chemicals can be categorized into 3 groups

室內有害化學品可以被分為3類

Chemical Substance 化學物質	Origin 來源
• Formaldehyde (HCHO) 甲醛	Plywood Board, Flooring. Furniture, Wall paper 防火夾板，地板， 傢俱，壁紙
• Volatile Organic Compounds 揮發性有機化合物	
1) Toluene, Xylene, Trimethyl Benzen 甲苯，二甲苯，三甲基苯	
2) Phosphoric acid triester (TCEP) 磷酸三氧乙酯	Non-flammable vinyl cloth 防火乙烯布
• Organic Phosphoric 有機磷系列物質	Pesticides 殺蟲劑

In a word, the absence of ventilation leads to improper airflow and coupled with the presence of pollutants, eventually results in oxygen deficiency which is definitely important and necessary for humans.

總而言之，缺乏換氣系統導致不適當的氣流，並且加上污染物的產生，最終導致氧氣不足。

Because of the above reasons, people are becoming increasingly aware of the importance of ventilation and indoor air quality. They believe that proper and effective ventilation is essential for removing excessive moisture that promotes pollutants, which can deteriorate building's structure and cause health problems. Here, Panasonic Ventilating Fans play an important role by removing volatile organic compounds (VOCs), to ensure proper indoor air circulation and conducts proper exchange between the air indoors and outdoors.

基於上述原因，人們越來越注意到換氣系統和室內空氣質素的重要性。他們相信適當和有效的換氣系統對除去助長污染物的過剩濕氣是十分重要的。

Panasonic換氣扇扮演一個十分重要的角色：透過去除揮發性有機化合物(VOCs)，確保良好的室內空氣循環和戶內與戶外的空氣交換。

Panasonic invites you to enjoy a fresh and healthy environment, feel a quiet and comfortable moment with its ventilating fans.

Panasonic 擬氣扇，為你提供健康舒適的環境，令你享受安靜宜人的感覺。

Ventilating Fan

換氣扇

Recommended application of Ceiling Mount Ventilating Fans

天花板型換氣扇建議使用地方

*ACH: Air Change Per Hour

每小時換氣次數

** Local regulations concerning the installation of
ventilating fans should be fulfilled.
換氣扇的安裝應根據當地條例。

** Installation methods please refer to the operation
instruction.
安裝方法請參照安裝說明書。

Features

優點

1

Long Life 長壽命

The unique design of new motor, incorporates with well-lubricated ball bearings, temperature rise is reduced that can increase the motor life time and prolongs the product durability.

獨特設計的馬達以及高度潤滑的滾珠軸承，可減低氣溫上升，再而增加馬達壽命及延長產品之耐用性。

2

High Efficiency 性能卓越

Taper blade design effectively controls the air turbulence surrounding the blade. That achieves the strong and smooth ventilating performance, as well as reduces the noise level, by whole of the blade.

錐形扇葉設計有效控制了扇葉週圍產生的亂流，實現了扇葉整體強力流暢的換氣功能。

Seam-processed casing ensures strength and hermetic sealing.

獨特的焊縫加工技術，提高了主機外殼的強度及密封性。

Reverse flow prevention shutter results in further improvement of air tightness.

防止氣流百葉，增強了密封性。

3

Super Low Noise 超靜音運作

Distinctive structure of "Double Chamber" minimizes the transmission of noise from fan and motor to exterior. This technology further reduces the operation noise to incredibly low level below 30dB(A) by "Resonance-Noise-Absorption" operation, which creates a tranquility and silent environment for your life.

"雙重面罩" 的獨創結構能使抽氣扇所產生的噪音傳輸減到最少。這技術可進一步使操作的聲音降低至30分貝以下，並為你創造寧靜和安靜環境。

4

Energy Saving 節約能源

The advanced casing design, along with the new motor, improves the fan performance effectively. Energy saving is attained by reducing power consumption down to 35%.

先進外殼設計配合超長壽命馬達，可有效地提高性能運作；此外，長時間使用仍能獲得節能效果達35%。

5

Easy Installation 簡易安裝

Wiring of power cord to product is pre-installed in factory, just connect the cord to power supply for operation.

電源接線已經預先裝上。只要把電線連接到電源便可操作。

Cassette type discharge adaptor facilitating installation of the product, as well as duct connecting work.

盒式匹配器，使進行通風管道的連接工作，更方便快捷。

6

Easy Maintenance 簡易維修

One touch louver allows installation and removal of louver by finger touch.

一按式入風面板，可以簡單地進行安裝及拆卸工作，方便清潔。

Installation Method

安裝方法

Method A (Suspension Brackets)

方法A(懸掛片)

Connect the adaptor assembly to the fan body, and fix the adaptor assembly using a hexagon screw.
安裝接頭組合到機體上，再用六角螺絲固定接頭組合。

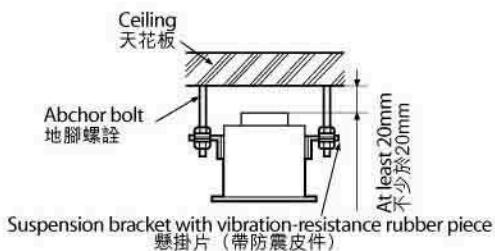

Fix the suspension bracket with screws.
用螺釘固定懸掛片。

The screw length should not exceed 8mm.
使用的螺釘長度不能超過8mm。

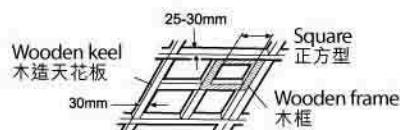

Mount the fan body enclosure on the anchor bolts
將機體安裝在地腳螺栓上。

Method B (Wooden Frame)

方法B(木框)

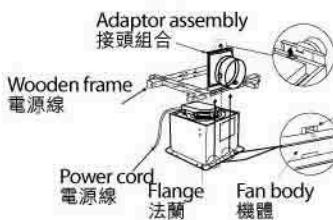

Build a wooden frame horizontally from the wooden keel.
在木造天花板上水平地搭建木框。

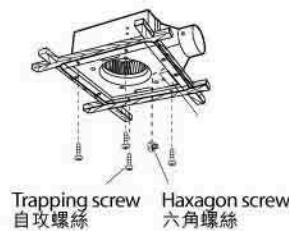

Attach the adaptor assembly to the wooden frames.
將接頭組合緊貼木框並安裝在木框一邊。

Insert the fan body in the wooden frame, and connect it to the adaptor assembly.
將機體安裝在木框內，並將機體與接頭組合連接起來。

Firmly secure the fan body with four trapping screws and a hexagon screw.
用四顆自攻螺絲和一顆六角螺絲機體牢固地定起來。

* Suspension brackets are optional accessories.

懸掛片乃另購配件。

* Vibration resistance rubbers and anchor bolts would be arranged locally.

防震皮件及地腳螺栓由當地安排或購買。
